

How To Properly Store Clear Vinyl Tarps

1. Clean Tarp

Clean both sides of dirt and debris with neutral soap and lukewarm water. **DON'T USE DETERGENTS!**

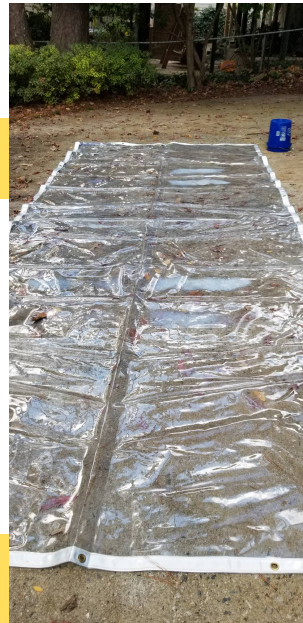

2. Dry Tarp Entirely

Lay down and elevate vinyl tarp or hang it up to dry. Make sure tarp is **ENTIRELY DRY** before you store it. Moisture and heat can make a clear vinyl tarp become clouded or discolored. (example images below)

3. Fold/Roll Tarp

Fold or roll your dry tarp for storage. Do not toss, bunch, or cram tarps as they could tear, rip, or create wrinkles.

4. Find Storage Location

Pick a cool, dry storage space for all your tarps. This can be a basement, garage, attic, or warehouse.
